IEIT INSTITUTE

Website & Digital Institute Platform

Client Product Documentation — Version 1.0

Prepared for: IEIT Institute
Scope: V1 Website & Basic Management Platform
Future Roadmap: V2 Features

1. Project Overview

The IEIT Website & Digital Institute Platform will provide a modern, professional online presence for IEIT and its three branches. The platform will help prospective students discover the institute, explore courses, find the most suitable branch, and submit enquiries or contact requests.

Version 1 focuses on the core public website experience and essential administrative capabilities. The platform will be designed so that additional institute-management features can be introduced in future versions.

2. Project Objectives

- Create a professional and responsive website for IEIT.
- Present IEIT's courses, branches, institute information, and activities clearly.
- Support all three current IEIT branches through one unified platform.
- Allow visitors to submit course/admission enquiries.
- Provide a simple contact mechanism for visitors.
- Provide authenticated administration for managing core website content and enquiries.
- Establish a scalable foundation for future student and institute-management features.

3. V1 Application Scope

V1 will include the following major functional areas:

Area	V1 Scope
Public Website	Home, About, Courses, Branches, Gallery, Contact and Enquiry
Branch Information	Information and courses for all three branches
Course Information	Course listing and individual course details
Enquiries	Online enquiry submission and admin enquiry management
Contact	Contact form and admin message viewing
Gallery	Public gallery and basic content management
Admin Access	Secure admin login and protected management area
Admin Management	Branches, courses, enquiries, messages and gallery

4. User Types

4.1 Website Visitor

- View IEIT information.
- Explore courses and course details.
- Explore the three branches.
- See courses available at each branch.
- View institute/branch images.
- Submit an enquiry.
- Submit a contact message.

4.2 Administrator

- Securely log in to the administration area.

- View a basic dashboard.
- Manage branch information.
- Manage course information.
- Manage which courses are available at each branch.
- View and update enquiry status.
- View and manage contact messages.
- Manage gallery content.

5. V1 Frontend Design & Pages

The frontend will be built as a modern, responsive educational institute website. The visual direction will be professional, clean, technology-focused, and easy to navigate on desktop and mobile.

5.1 Home Page

- Header/navigation with IEIT branding.
- Hero section with a clear introduction and primary call-to-action.
- Institute introduction.
- Key institute statistics.
- Featured/popular courses.
- Why choose IEIT section.
- Three-branch overview.
- Gallery preview.
- Enquiry call-to-action.
- Footer with contact information and useful links.

5.2 About IEIT

- Institute overview and history.
- Mission and vision.
- Why students may choose IEIT.
- Training/education approach.
- Achievements and key information.

5.3 Courses

- Course listing with clear course cards.
- Course category/filter presentation where appropriate.
- Course name, short description and duration.
- Link to detailed course information.

5.4 Course Details

- Course overview and detailed description.
- Duration and eligibility.
- Fee information where applicable.
- Course highlights/overview.
- Branches where the course is available.
- Prominent enquiry call-to-action.

5.5 Branches

- Overview of all three IEIT branches.
- Branch cards with essential information.
- Address, contact details and opening hours.
- Link to individual branch details.

5.6 Branch Details

- Branch introduction.
- Address and contact information.
- Opening hours.
- Location/map section.
- Courses available at the branch.
- Enquiry call-to-action.

5.7 Gallery

- Institute, classroom, event and activity images.
- Clean visual gallery layout.
- Responsive image presentation.

5.8 Contact

- Institute contact information.
- Contact form.
- Phone/email information.
- Location/map information.
- Clear enquiry/contact call-to-action.

5.9 Enquiry

- Student name.
- Phone number.
- Email address.
- Preferred branch.
- Interested course.
- Message.
- Submission confirmation.

6. V1 Admin Frontend

The administration area will be a separate authenticated section of the application.

Page	Purpose
Admin Login	Secure administrator access
Dashboard	Overview of branches, courses, enquiries and messages
Branches	View, add, edit and manage branch information
Courses	View, add, edit and manage courses
Branch-Course Management	Control which courses are available at each branch
Enquiries	View enquiries and update their status
Messages	View and manage contact messages
Gallery	Manage public gallery content

7. Detailed V1 Features

7.1 Multi-Branch Support

The platform will support IEIT's three existing branches while keeping the experience flexible for additional branches in the future.

7.2 Course Management

- Course listing and details.
- Course duration and eligibility information.
- Course fee information where applicable.
- Course categorization.
- Course availability by branch.

7.3 Enquiry Management

- Online enquiry submission.
- Enquiry storage and viewing by administrators.
- Branch and course association.
- Enquiry status tracking: New, Contacted, Converted and Closed.

7.4 Contact Management

- Online contact form.
- Message storage.
- Read/unread management for administrators.

7.5 Gallery

- Public image gallery.
- Basic administrative image management.

7.6 Admin Authentication

- Administrator login.
- Protected administration area.
- Logout.
- Authenticated access to management features.

8. Frontend Design Principles

- Professional and trustworthy education-focused visual identity.
- Clear information hierarchy and simple navigation.
- Strong call-to-action placement for enquiries.
- Responsive design for mobile, tablet and desktop.
- Consistent typography, spacing, buttons and cards.
- Fast-loading and lightweight page experience.
- Accessible and readable content.
- Clear presentation of the three branches without overwhelming the visitor.

9. V1 Exclusions

The following features are intentionally outside the V1 scope:

- Student login and student dashboard.
- Online classes or learning management system.
- Attendance management.
- Online examinations.
- Student results management.
- Online fee/payment management.
- Certificate generation and verification.
- Faculty/staff management.
- Full student admission management.
- Mobile application.
- Advanced analytics and reporting.
- Complex multi-role administration.
- Automated SMS/WhatsApp notification workflows.

10. V2 Feature Roadmap

V2 will extend the V1 platform from a website and basic content/enquiry system into a more complete digital management platform for the institute.

Student Management

- Student registration and profiles.
- Student admission records.
- Student dashboard.
- Student course/branch information.

Online Admission

- Online admission/application form.
- Application tracking.
- Admin admission review.
- Admission status management.

Fee & Payment Management

- Student fee records.
- Payment history.
- Online payment integration.
- Receipts and payment status.

Attendance Management

- Student attendance records.
- Branch/course-based attendance.
- Attendance summaries.

Examination & Results

- Exam management.

- Marks/results entry.
- Student result viewing.
- Result history.

Certificate Management

- Certificate generation.
- Certificate records.
- Public certificate verification.

Faculty & Staff Management

- Faculty profiles.
- Staff records.
- Course/branch assignments.

Communication & Notifications

- Email notifications.
- SMS/WhatsApp integration where required.
- Admission and payment notifications.
- Announcements/notices.

Advanced Admin & Reporting

- Role-based administration.
- Branch-level reporting.
- Student and admission reports.
- Course performance reports.
- Enquiry conversion reports.

11. Possible V2 Frontend Pages

- Student Login
- Student Dashboard
- My Profile
- My Courses
- Attendance
- Results
- Fees & Payments
- Certificates
- Notices/Announcements
- Admission Status

12. V1 Completion Criteria

- All approved public website pages are designed and functional.
- All three IEIT branches can be represented and displayed.
- Courses can be presented and associated with branches.
- Visitors can submit enquiries and contact messages.

- Administrators can securely access the management area.
- Administrators can manage core branch and course information.
- Administrators can manage enquiries and contact messages.
- Gallery content can be displayed and managed.
- The website is responsive across desktop, tablet and mobile.
- The V1 platform is ready for future V2 expansion.

13. Overall Product Roadmap

Release	Primary Focus
V1	Professional public website, branches, courses, enquiries, contact, gallery and basic admin management
V2	Student management, online admission, fees/payments, attendance, exams, results and certificates
Future	Advanced automation, notifications, analytics, deeper institute operations and mobile experiences

14. Scope Notes

This document defines the product scope at a client-facing level. It intentionally does not include low-level technical design, database schemas, API specifications, code structure, or implementation details. Those will be prepared separately during the technical planning stage.
